

## Source code- Deploy Application on Cloud

```
package com.awsccloud;  
  
import org.springframework.boot.SpringApplication;  
import org.springframework.boot.autoconfigure.SpringBootApplication;  
import org.springframework.web.bind.annotation.GetMapping;  
import org.springframework.web.bind.annotation.RestController;  
  
@SpringBootApplication  
@RestController  
public class SpringBootAwsExampleApplication {  
    @GetMapping("/")  
    public String home() {  
        return "Welcome to AWS First Deployment....!!";  
    }  
    public static void main(String[] args) {  
        SpringApplication.run(SpringBootAwsExampleApplication.class, args);  
    }  
}
```
